

KLONDIKE Universal Tractor Fluid

PRODUCT DESCRIPTION

KLONDIKE Universal Tractor Fluid is a specialized, advanced formulation designed to fulfill the torque transfer, hydraulic, and power transmission requirements of farm tractors and other mobile off-road equipment. This multi-functional fluid provides outstanding operating and maintenance benefits across a broad temperature range for increased operating efficiency, performance, and component protection.

APPLICATIONS

KLONDIKE Universal Tractor Fluid is designed and recommended for use in all kinds of agricultural equipment, off-highway machinery, and industrial tractors. This premium, multi-functional formulation is a single fluid that may be used to lubricate all conventional points on an agricultural or industrial tractor or piece of mobile equipment that has a common sump supplying oil to the transmission, final drive, power take-off, wet brakes, power steering, hydrostatic, and hydraulic systems. This fluid is suitable for use in all major brand OEM equipment where such a fluid is specified.

This multi-functional fluid also meets the requirements of API GL-4 gear oil, Allison C-4 off road transmission specifications, and hydraulic pump manufacturer's requirements for anti-wear hydraulic fluid.

FEATURES AND BENEFITS

KLONDIKE Universal Tractor Fluid is formulated with the highest quality, ultra-pure paraffinic components and high performance additives. These advanced base oils have been chosen to maximize performance and provide long term, trouble free service in high-torque, high-output applications operating under heavy loads and severe stress. This multi-functional fluid will deliver smooth power transfer and reliable, consistent performance in modern, heavy duty equipment operating in conditions subject to wide ambient and system operating temperatures.

KLONDIKE Universal Tractor Fluid delivers value through the following benefits:

- **Friction material compatibility** – balanced frictional characteristics and high shear stability ensure precise clutch and wet brake operation with unsurpassed chatter suppression.
- **High oxidation stability** – extra resistance to thermal degradation provides superior protection against oxidation and deposit formation.
- **Outstanding anti-wear** – exceptional protection against wear from microscopic contaminants at high operating temperatures and pressures ensures long equipment life.
- **Increased efficiency** – the right fluid maximizes equipment reliability and minimizes maintenance costs.
- **Optimal oil service life** – high oxidation stability maximizes fluid life for reduced oil changes and improved fluid economy.
